

SHRINIWAS ALLE

SENIOR QA ENGINEER

SAMPLE COPY

SUMMARY PROFILE

Results-driven Senior QA Engineer with 9+ years of experience in automation and quality engineering across SaaS and enterprise applications. Specialized in Playwright with TypeScript, delivering scalable automation frameworks that reduced regression cycles by up to 40%. Strong expertise in AI-driven testing, speech analytics validation, and modern QA practices including Playwright MCP and cloud-based monitoring. Experienced in CI/CD pipelines, test orchestration, and AWS-based environments to ensure continuous quality delivery. Proven ability to enhance test coverage, improve defect detection rates, and optimize release cycles in Agile environments. Adept at collaborating with cross-functional teams to drive quality-first culture and continuous improvement.

WORK EXPERIENCE

❖ **SENIOR QA ENGINEER** **NOV 2024 - PRESENT**
NICE, PUNE

Project: SpeechIQ (Speech Analytics Platform)
(AI-powered platform analyzing customer-agent interactions through call recordings, sentiment detection, transcription, and automated scoring.)

Key Responsibilities

- Developed and maintained automation scripts using Playwright (TypeScript), increasing regression coverage by ~35%
- Automated validation of AI-driven outputs including sentiment analysis, transcription accuracy, and keyword detection
- Designed and executed test strategies for speech analytics workflows, reducing production defects by ~20%
- Integrated automated test suites with Jenkins & GitLab CI/CD pipelines for continuous testing and deployment
- Performed API and backend validation for large-scale call data processing systems using SQL and REST tools
- Implemented AWS Canaries for synthetic monitoring to track system performance and availability
- Built reusable automation components for AI-based validation scenarios to improve framework scalability
- Validated real-time speech-to-text pipelines and ensured accuracy of NLP-based intent classification and scoring

❖ **SENIOR QA ENGINEER** **AUG 2023 – OCT 2024**
CYBAGE SOFTWARE, PUNE

Project: Booking.com (Rental Cars)
Tech Stack: Selenium WebDriver, TestNG, Maven, Jenkins, AWS CloudWatch, AWS S3, Postman, Rest-Assured, DBUnit, SoapUI, Grafana

Key Responsibilities

- Developed and maintained Selenium automation suites for rental booking workflows, improving regression efficiency by 55%.
- Automated REST API validations using Rest-Assured and Postman for booking, payment, and reservation services.
- Integrated automation pipelines with Jenkins for continuous execution and automated reporting.
- Performed database validation and backend testing using DBUnit and SQL queries to ensure data accuracy.
- Worked closely with developers and DevOps teams to identify production issues and reduce release defects by 30%.

PERSONAL INFO

Phone No : +91 8698556642, 9921645291
Email id : shriniwasalle4@gmail.com
LinkedIn : [shriniwas-alle-22080a202](#)

Address Pune, Maharashtra, India
Nationality Indian
D.O.B
Gender Male
Marital Status Single

CORE COMPETENCIES

- Test Automation Framework Development
- Playwright (TypeScript) & Selenium
- AI Testing & Speech Analytics Validation
- Playwright MCP & Smart Test Orchestration
- API Testing (REST/GraphQL)
- CI/CD Integration (Jenkins, GitLab)
- Cloud Testing (AWS, Canaries)
- Performance & Regression Testing
- Agile & Scrum Methodologies
- Defect Management & Root Cause Analysis
- Database Testing (MySQL, SQL Server)
- Test Strategy & Quality Engineering

EDUCATION

2019 – 2023 Bachelor of Engineering
(Information Technology)
Shivaji University

STRENGTH SKILLS

- Analytical Thinking
- Problem Solving
- Team Leadership
- Adaptability
- Communication

TECHNICAL SKILLS

- Languages: Java, TypeScript, JavaScript
- Automation Tools: Playwright, Selenium WebDriver, Cucumber, TestNG
- API Tools: Postman, Rest Assured
- Cloud & DevOps: AWS, Jenkins, GitLab, AWS Canaries
- Databases: MySQL, Oracle, SQL Server
- Tools: Jira, Confluence, GitHub Actions
- Other: React (Basic), CI/CD Pipelines, Agile Tools

KEY ACHIEVEMENTS

- Reduced regression testing time by 50% through Playwright automation.
- Successfully migrated legacy Selenium framework to modern Playwright stack.
- Improved defect detection rate by 35% across projects.
- Implemented AI-based testing solutions increasing efficiency by 30%.
- Led automation initiatives improving team productivity by 25%.
- Built scalable CI/CD pipelines reducing release cycles by 40%.

LANGUAGES KNOWN

- English
- Hindi
- Marathi

- Executed cloud monitoring validation using AWS CloudWatch and Grafana dashboards for production health tracking.
- Participated in Agile sprint activities, defect triage meetings, and release planning processes.

❖ SENIOR QA ENGINEER – II MAR 2021 – JUN 2023
MICROSOFT + NUANCE COMMUNICATIONS, PUNE

Project: Nuance Console (BL, PT, IVR Applications)
Tech Stack: Playwright, TypeScript, Cucumber, GitHub Actions, Azure Static Web Apps, React Library

Key Responsibilities

- Built Playwright automation framework from scratch and migrated legacy Selenium scripts, improving execution speed by 60%.
- Implemented GitHub Actions CI/CD pipelines for automated regression and nightly execution processes.
- Assisted manual QA teams in automation adoption through technical mentoring and hands-on Playwright training sessions.
- Automated critical IVR and conversational AI workflows for enterprise communication applications.
- Worked on React-based feature enhancements and production defect fixes for web applications.
- Collaborated with stakeholders for sprint planning, automation estimations, and release quality validation.

❖ AUTOMATION QA CONSULTANT DEC 2018 – FEB 2021
BRISTLECONE INDIA LTD, PUNE

Project: Data Center (DC4)
Tech Stack: Selenium WebDriver, TestNG, JIRA

Key Responsibilities

- Designed and executed test cases based on application requirements.
- Automated regression test suites using Selenium and TestNG.
- Maintained and enhanced automation scripts for reliability.
- Performed end-to-end testing of data center workflows.
- Conducted knowledge transfer sessions for new team members.
- Identified and reported critical defects during testing cycles.
- Collaborated with stakeholders to improve testing strategies.

❖ EDI TEST ANALYST JUN 2015 – JAN 2017
SANTEON INDIA LTD, PUNE

Project: Benefits Network Portal
Tech Stack: Manual Testing, Selenium, Java, MySQL

Key Responsibilities

- Developed test plans, scenarios, and detailed test cases.
- Performed manual and automation testing using Selenium and Java.
- Validated EDI transactions and mappings for accuracy.
- Conducted requirement analysis and business validation.
- Managed defect lifecycle from identification to resolution.
- Performed backend validation using MySQL.
- Collaborated with business teams to ensure requirement alignment.

DECLARATION

The information provided in this CV is accurate and true to the best knowledge.
